RECYCLABLE MATERIALS—DEFINITIONS

This list provides definitions of recyclable materials, including materials that Montgomery County requires businesses to recycle, as well as additional materials that businesses may choose to recycle voluntarily. This document provides information to County businesses to assist them in complying with Executive Regulation 15-04AM, the County's business recycling regulation.

REQUIRED RECYCLABLE MATERIALS

MIXED PAPER:

Includes acceptable paper items which are not separated by type, but are mixed and collected together. These items include white paper, colored paper, corrugated cardboard, boxboard, newspapers and inserts, magazines, catalogs, telephone directories, paperback books, unwanted mail, and other clean, dry paper. Businesses have the option to separate for recycling collection any of these items.

COMMINGLED MATERIALS:

Includes acceptable items such as those listed below that are not separated by type, but are mixed together in one container. Businesses have the option to separate for recycling collection any of these items.

- Glass bottles and jars.
 - Clear, brown, and green glass bottles and jars.
 - **Note:** Broken glass and glass that is not food packaging, such as light bulbs and windows **ARE NOT** acceptable in most conventional recycling programs.
- Aluminum cans and foil products.
 - Aluminum cans, which usually contain soft drinks or beer.
 - Aluminum foil.
- Bi-metal cans.
 - Steel/tin cans are usually generated by food service.
- Plastic bottles with a neck.
 - Any plastic bottle that has a neck, in which the top is narrower than the bottom.

YARD TRIM:

If you have substantial green space on your property or are in a horticulturally oriented business, you probably have leaves, grass, and brush that must be reduced, composted or recycled. The most preferred option is to grasscycle or compost yard trim materials on-site, directly at the source. Only in instances where materials cannot be handled on-site, should they be transported off-site to a composting facility.

CHRISTMAS TREES.

SCRAP METAL.

Acceptable items consisting of metal and/or predominantly metal materials. These items include washers and dryers, refrigerators, air conditioners, dishwashers, sinks, stoves, freezers, furnaces, hot water heaters, trash compactors, iron furniture, doors, cabinets, humidifiers/dehumidifiers, bikes, swing sets, aluminum lawn chairs, shower stalls, and disassembled metals sheds.

Other materials that can be voluntarily recycled:

BATTERIES:

Alkaline, automotive, dry cell, gel type, and ordinary household batteries. Please itemize by battery type, if possible.

CONSTRUCTION MATERIALS:

Doors, fencing/lumber, sheds, drywall, flooring, carpeting, kitchen cabinets, hardware, toilets, bathtubs, cinder blocks and sinks.

COMPUTER EQUIPMENT:

Old or unwanted processing units, hard drives, monitors, keyboards, printers and copiers, wires and power cords, scanners, software, etc.

PLASTIC FILM (BAGS):

Includes plastic shopping bags, food wrap, dry-cleaning bags, plastic liners and tarps. May display recycling symbol #4-LDPE, low-density polyethylene.

POLYSTYRENE FOAM (STYROFOAM):

Includes packaging and products made of expanded polystyrene. May display recycling symbol #6-PS.

WOOD WASTE - OTHER:

Treated scrap wood, pallets (if treated), products made of wood, and wood/brush more than 4 inches in diameter.

RECYCLING COMPANIES

This SORRT Resource List identifies companies that haul, collect, process, and/or recycle various materials. The first section of this document lists recyclers alphabetically by company name. The second section of the document lists companies providing specialized services by category of material(s) handled. Montgomery County has compiled this listing through various sources and does not present it as a complete directory of all vendors that service Montgomery County, nor offer it as an endorsement of any of the companies.

This list is current as of May 2004.

To ensure the long-term success of your recycling program, it is important to establish a contract or service agreement with your recycling service provider which identifies specific services to be performed, rebates and revenues (if any) to be applied and how they are to be applied, and market conditions which may affect the contract.

Keep in mind that collection services, container types, and education or support services offered by recycling companies can vary from one firm to the next. Some companies accept numerous recyclable materials while others accept only select specific materials. Most companies offer pick-up services, but others accept only materials dropped off for recycling. Almost all companies which provide pick-up service also supply the centralized dumpsters or totes which are actually emptied into the collection vehicles. In addition, some companies can also supply the smaller-sized collection containers used within work areas. Some recycling firms haul or collect exclusively, while others act as brokers and/or processors of recyclable materials. These days, many companies offer both refuse and recycling services. There is a wide range of offerings in the marketplace.

In your search for a recycling and/or refuse collection company, you should contact at least three to four firms for proposals and/or bids. This enables you to find the company that best meets the service needs of your organization, at the best pricing available on the market.

For additional information on finding the recycling company that best suits the needs of your organization, see the Montgomery County Business Recycling Regulation Handbook, Section 2: How to Set-Up a Business Recycling Program. Step 4 of this section spells out the process of selecting a recycling company. For more information on the economic aspects of business recycling, pricing, and negotiating a contract or service agreement, see Section 7: Recycling Cost Factors. For more information, contact the Montgomery County Business Recycling Program at (240) 777-6400.

RECYCLING CONTAINER AND EQUIPMENT SUPPLIERS

This SORRT Resource List identifies companies that manufacture and/or distribute recycling containers and equipment. Montgomery County has compiled this listing through various sources and does not present it as a complete directory of all vendors that service Montgomery County, nor offer it as an endorsement of any of the companies.

This list is current as of May 2004.

Business recycling can be made easier with specialized recycling containers. Containers are available in a variety of shapes, sizes and colors and can be compatible with the décor and image of your work place. Although specialized recycling containers offer many benefits such as high visibility for your program and an organized system for separating your recyclables from the rest of your solid waste, these are not required to implement an effective recycling program.

RECYCLED PRODUCTS GUIDE

This SORRT Resource List identifies companies that sell recycled paper, paper products, and other products that contain recycled material. Montgomery County has compiled this listing through various sources and does not present it as a complete directory of all vendors that service Montgomery County, nor offer it as an endorsement of any of the companies. **This list is current as of May 2004.**

IF YOU'RE NOT BUYING RECYCLED, YOU'RE NOT FULLY RECYCLING. FULLY CLOSE THE RECYCLING LOOP. One factor influencing the stability and long-term success of recycling programs is the market condition for recyclable materials. If there is strong demand for products and materials manufactured from recyclables, then there is a constant need for greater supply of recycled feedstock. This situation then helps to ensure that there are viable markets for the materials which you separate from the trash and recycle. Therefore, it is vital to keep up (and even increase) demand for recycled products and materials; your organization helps to increase this critical demand.

"BUY RECYCLED." Support recycling by purchasing recycled items. Quality and variety of products are improving. Pricing is, in many instances, comparable to pricing for virgin materials. Recycled paper varieties include – colored paper, white office paper, computer paper, card stock, envelopes, bathroom tissue, and hand towels. When ordering, ask for paper made from the highest percentage of recycled content material, preferably post-consumer.

For additional information on purchasing recycled products, see the Montgomery County Business Recycling Handbook, Section 6: Close the Loop! Buy Recycled, or contact the Montgomery County Business Recycling Program at (240) 777-6400.

RECYCLING COST FACTORS

A variety of factors influence the cost of setting up a new recycling program for a business. Start-up costs may include the actual expense of purchasing or leasing additional containers and/or dumpsters for storing recyclable materials, and the cost of handling and transporting recyclable materials to an off-site processing facility by the hauler or collector.

While there may be new costs realized in establishing a recycling program, a well-planned program with active employee participation can actually provide appreciable cost savings in the long run, especially when education and waste reduction becomes an integral part of the recycling effort.

It is important to realize that all of the recyclable materials are being pulled out of the existing waste (trash) stream. Thus, the volume and tonnage of the waste for disposal decreases proportionately, which, in turn, should reduce the current cost of trash disposal (handling and transportation costs, including landfill disposal costs). With less trash generated (both through waste reduction efforts and through diversion to recycling), the number and/or size of the trash containers can decrease, the number of pick-ups can decrease, and the amount paid in tip fees (actual cost of placing materials in a landfill) should also decrease.

A business making a serious commitment to recycling is taking valuable, recyclable materials out of the dead-end waste stream, and giving them new life as valuable raw materials to re-manufacture into new products. This practice is important for the sustainable health of the overall business community and economy. Moreover, depending on the types of material being recycled, the market conditions and demand for those materials, and the volume of materials being recycled, there may be valuable rebates available to the business. These rebates may further reduce the overall cost of both recycling and trash disposal.

As you negotiate service contracts for recycling and trash hauling or collection services, carefully review the full range of cost options, as well as the potential to reduce the size and/or number of trash containers, as you bring in recycling containers. Be sure to explore rebate potentials for various materials and develop a mechanism for crediting those rebates to invoices for your recycling service.

Recycling can be cost effective if a program is carefully planned and coordinated with staff and employees, and if your contracts reflect your waste reduction and recycling efforts. The Business Recycling Program of Montgomery County's Division of Solid Waste Services can provide you with additional information and assistance for developing an efficient program with achievable goals. Call SORRT at (240) 777-6400 for further help.
